PROFESSIONAL SUMMARY

Senior Full-Stack & Platform Engineer with 10+ years of experience architecting, scaling, and operating mission-critical enterprise systems across financial services, automotive, and retail domains. Expert in fusing full-stack microservices (React, Node.js, Java Spring Boot) with production-grade AI intelligence, agentic workflows, and high-throughput event-driven architectures. Active PhD candidate in Computer Science with published research and recognized industry contributions in deterministic AI security, self-healing cloud systems, and enterprise API modernization.

TECHNICAL EXPERTISE

- **AI & Agentic Systems:** LLMs, Agentic Architectures, LangChain, LlamaIndex, RAG Pipelines, Pinecone, Guardrails & Security Firewalls, CNN Feature Extraction
- **Languages & Frameworks:** TypeScript, JavaScript, Java, Python, SQL, Spring Boot, Node.js (Express/Fastify), FastAPI, React
- **Cloud, DevOps & Observability:** AWS (EC2, Lambda, API Gateway), GCP, Kubernetes, Docker, CI/CD, Kafka, RabbitMQ, Redis, Splunk, Dynatrace, SonarQube

PROFESSIONAL EXPERIENCE

JPMorgan Chase & Co. | New York, NY

Senior Software Engineer | *Jun 2023 – Present*

- **API Modernization & Cloud Architecture:** Spearheaded the transition of flagship Investment Discovery and Experience APIs from legacy SOAP architectures to cloud-native RESTful microservices, implementing defensive programming and structured logging across dev, test, and production AWS clusters.
- **Enterprise AI Deployment:** Co-developed the "Magic Button" LLM proof-of-concept, optimizing prompt tuning and data privacy filters to inject automated client summaries into wealth advisor workflows.
- **Reliability Engineering:** Lifted SonarQube test coverage from 18% to 80% through aggressive unit, integration, and contract test suites, contributing to zero P1 production incidents in 2025.
- **Infrastructure Security:** Managed end-to-end TLS and ADFS certificate lifecycles across distributed Kubernetes/AWS clusters during live cloud migration cycles.

Walmart Global Tech | Dallas, TX

Software Engineer | *Dec 2022 – Jun 2023*

- **Real-Time Analytics:** Engineered high-performance React analytics dashboards displaying real-time shopper behavior metrics under strict performance SLA guidelines.
- **Compliance & Security:** Implemented region- and role-based access control (RBAC) modules, maintaining corporate compliance standards under strict TDD frameworks.

Ford Motor Company (via Altimetrik) | Dearborn, MI
Software Engineer | Mar 2021 – Dec 2022

- **Platform Scaling:** Scaled the Electric Vehicle (EV) Beta Program web portal using React/TypeScript and Java Spring Boot, supporting ~15,000 active vehicle testers nationwide.
- **Observability & Tracing:** Integrated end-to-end user analytics and distributed tracing via Splunk and Amplitude, significantly reducing error detection times during live feature rollouts.

Synchrony Financial (via HCL America) | Stamford, CT
Senior Software Engineer | Jun 2018 – Dec 2021

- **Event-Driven Payments:** Designed decoupled payment microservices processing 1.2M+ transactions/day with sub-50ms latency profiles leveraging Kafka, RabbitMQ, and Redis.
- **Rules Engine Optimization:** Streamlined the corporate OpenL rules engine, compressing credit feature configuration cycles by 80%.

SPEAKING & COMPETITIONS

- **Keynote Speaker – JPMC Manhattan Innovation Week:** Presented *"Financial Guardrail Agent: A Security-First Approach to Agentic AI,"* detailing architectural frameworks to enforce deterministic security boundaries between LLM models and core financial APIs.
- **Top Finisher – AWS AI Builder Lab NYC (Clash of Agents, July 2026):** Ranked **26th** in a high-intensity, hands-on hackathon building and deploying autonomous AI agents in real-time competitive scenarios sponsored by AWS, OpenAI, LangChain, and LlamaIndex.

PUBLICATIONS & ACADEMIC RESEARCH

- **Peer-Reviewed Journal Publication:** *"Machine learning techniques for exploring influence, commonalities, and shared origin of scripts,"* published in *Digital Scholarship in the Humanities (DSH)*, Oxford University Press.

EDUCATION & CREDENTIALS

- **PhD in Computer Science (In Progress)** | University of the Cumberlands, KY
Research Focus Track: Self-Healing Cloud Frameworks & Agentic System Resiliency
- **M.S. in Computer Science (2020)** | San Diego State University, CA
- **B.E. in Electronics & Communication Engineering (2014)** | VTU, India
- **Certifications:** AWS Certified Developer | Google Cloud Professional Engineer
