PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years of experience architecting, scaling, and operating critical enterprise systems across financial services, automotive, and retail domains. Expert in combining full-stack architectures (React, Node.js, Java Spring Boot) with production-grade AI intelligence and high-throughput event-driven microservices. Currently pursuing a PhD in Computer Science with a core research focus track on self-healing cloud frameworks.

TECHNICAL EXPERTISE

- **Languages & Frameworks:** TypeScript, JavaScript, Java, Python, SQL, Spring Boot, Node.js (Express/Fastify), FastAPI, React
- **Cloud & DevOps:** AWS (EC2, Lambda, API Gateway), GCP, Kubernetes, Docker, CI/CD, Kafka, RabbitMQ, Redis
- **AI & Observability:** LLMs, RAG Pipelines, Pinecone, CNN Feature Extraction, Splunk, Dynatrace, SonarQube

PROFESSIONAL EXPERIENCE

JPMorgan Chase & Co. | New York, NY

Senior Software Engineer | Jun 2023 – Present

- **API Modernization:** Led the transition of flagship Investment Discovery and Experience APIs from legacy SOAP architectures to cloud-native RESTful microservices, implementing structured logging and defensive programming.
- **Reliability Engineering:** Lifted SonarQube test coverage from 18% to 80% through aggressive unit, integration, and contract test suites, contributing to zero P1 incidents in 2025.
- **AI Innovations:** Co-developed the "Magic Button" LLM proof-of-concept, optimizing prompt tuning and data privacy filters to inject automated client summaries into wealth advisor workflows.
- **Infrastructure Ownership:** Owned end-to-end TLS and ADFS certificate lifecycles across dev, test, and prod clusters during an active AWS migration.

Walmart Global Tech | Dallas, TX

Software Engineer | Dec 2022 – Jun 2023

- Engineered high-performance React analytics dashboards displaying real-time Shopper Behavior analytics.
- Maintained strict corporate compliance metrics using region- and role-based access control modules under TDD frameworks.

Ford Motor Company (via Altimetrik) | Dearborn, MI*Software Engineer | Mar 2021 – Dec 2022*

- Scaled the EV Beta Program web portal utilizing a React/TypeScript and Java Spring Boot stack, supporting ~15,000 active vehicle testers nationwide.
- Embedded end-to-end user analytics and tracing via Splunk and Amplitude, minimizing error detection rates during live rollouts.

Synchrony Financial (via HCL America) | Stamford, CT*Senior Software Engineer | Jun 2018 – Dec 2021*

- Designed decoupled, event-driven payment microservices processing 1.2M+ transactions/day with sub-50ms latency profiles via Kafka, RabbitMQ, and Redis.
- Optimized the corporate OpenL rules motor, compressing credit feature configuration intervals by 80%.

PUBLICATION

- "Machine learning techniques for exploring influence, commonalities, and shared origin of scripts"
Published in **Digital Scholarship in the Humanities (DSH)**, **Oxford University Press**.

EDUCATION & CREDENTIALS

- **PhD in Computer Science (In Progress)** | University of the Cumberlands, KY
 - *Research Track Focus:* Self-Healing Cloud Frameworks
- **M.S. in Computer Science (2020)** | San Diego State University, CA
- **B.E. in Electronics & Communication Engineering (2014)** | VTU, India
- **Certifications:** AWS Certified Developer | Google Cloud Professional Engineer
